Jewellery

User manual and guide — daily metal rates, weight-based products and billing, printing, and supplier receipts

START HERE

Before you begin

1. Open **Admin > Module Setup** and switch on **Jewellery**.
2. Give staff the jewellery permissions (table at the end of this guide).
3. Set today's metal rates (Chapter 2), then add your pieces (Chapter 3).

How a price is worked out

Part	Calculation
Net weight	Gross weight – stone weight
Metal value	Net weight × today's rate per gram
Wastage	Metal value × wastage %
Making	Net weight × ₹ per gram, or a fixed ₹, or metal value × %
Stones	The stone charge in ₹
GST	3% of (metal + wastage + making + stones): SGST 1.5% + CGST 1.5%

Chapters

1. The Jewellery Dashboard
2. Today's Gold and Silver Rates
3. Adding Jewellery Products
4. Selling by Weight
5. Jewellery Invoices and Printing
6. Receiving Stock from a Supplier

The Jewellery Dashboard

Today's gold and silver rates, today's sales, and the grams of gold and silver in stock.

Who	Owner, counter staff	How often	Every morning
-----	----------------------	-----------	---------------

Why it matters

Every price in the shop follows today's rate. One look tells you whether the rate has been set this morning.

How to use it

1. Open **Jewellery > Dashboard**. **Today's Metal Rates** shows the rate per gram for each metal and purity, and when it was set.
2. The tiles show today's jewellery sales, the number of products, and the grams of gold and silver in stock.
3. Use **Quick Links** for products, the rate update, a new invoice or a purchase receipt.

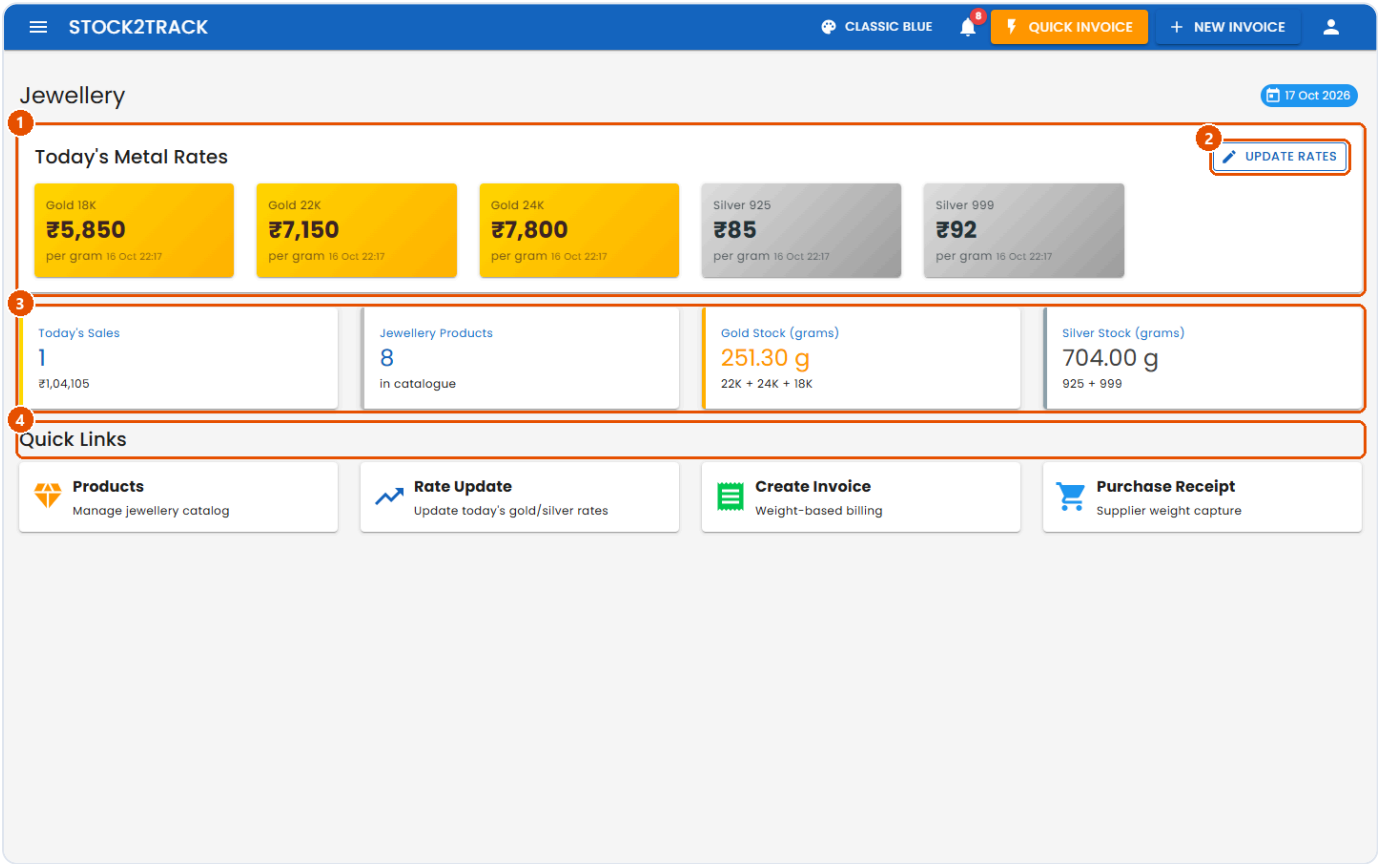

Figure 1. The dashboard

- | | |
|--|---|
| 1 Today's rate per gram, and when it was set | 3 Today's sales, products, gold and silver in stock |
| 2 Change the rates | 4 Shortcuts |

Before you start

Privilege **Jewellery View**. The **Jewellery** module must be on in Admin > Module Setup.

Good to know

- If a rate shows yesterday's time, update it before the first sale.

Today's Gold and Silver Rates

Type today's rate per gram. Every jewellery product of that metal and purity is repriced at once.

Who	Owner	How often	Every morning
-----	-------	-----------	---------------

Why it matters

Prices follow the rate automatically, so no piece is sold at last week's price.

How to use it

1. Open **Jewellery > Metal Rate Update**. Each metal and purity shows its current rate.
2. Type today's rate in **New Rate (₹/g)**. **Change %** shows the movement in green or red.
3. Press **Preview Impact** to see each product's old and new price.
4. Press **Apply Rate Update**. The rates are saved, the products repriced, and the change logged in **Rate History** with your name.

- 4

Save and reprice

Before you start

Privilege **Jewellery Rate Update**.

Good to know

- A rate of 0 is skipped.
- On a new installation the rates are sample values. Set the real rates before the first sale.

Adding Jewellery Products

Each piece with its metal, purity, weights, wastage, making charge, stones and HUID. The price is worked out live.

Who	Owner, stock staff	How often	When pieces arrive
-----	--------------------	-----------	--------------------

Why it matters

Weights and charges are written once, at the counter nobody guesses. The HUID ties the piece to its hallmark.

How to use it

1. Open **Jewellery > Products**. Type the **Product Name**, the **HSN Code** (7113), a barcode (press **Generate**) and the **HUID**.
2. Choose the **Metal Type** and **Purity**; today's **Rate** fills in.
3. Type the **Gross Wt** and **Stone Wt**; the **Net Wt** is gross minus stone.
4. Set the **Wastage %**, the **Making Type** (per gram, fixed, or percent of the metal value) with its value, and the **Stone Charges**.
5. **Live Pricing Preview** shows the metal value, wastage, making, stones, GST and the line total. For a new piece, type the opening stock and location, and press **Add Product**.

| 2 | Metal, purity and today's rate | 5 | The price, worked out live |
| 3 | Gross, stone and net weight | | |

Before you start

Privilege **Jewellery Update**. Set the metal rates first.

Good to know

- When editing a piece, correct the Net Wt yourself if you change the gross or stone weight.
- Deleting a piece that has been sold only switches it off.

Selling by Weight

A bill that shows, for each piece, the weight, rate, wastage, making, stones and GST.

Who	Counter staff	How often	Every sale
-----	---------------	-----------	------------

Why it matters

The customer sees how the price is made up. The figures come from the product and today's rate, not from a calculator at the counter.

How to use it

1. Open **Jewellery > Create Invoice**. Type the customer's **Phone**; an existing customer is filled in.
2. Search the piece by name, HUID or barcode. Its weights and charges and today's rate fill in; change any of them for this sale if needed.
3. Press **Add to Invoice**. Add the other pieces the same way.
4. **Invoice Summary** shows the totals and SGST 1.5% plus CGST 1.5%. Take the payment by cash, card, wallet or UPI, or a coupon. Anything unpaid is recorded as due.
5. Press **Create Invoice**. The piece leaves stock and the print page opens.

Figure 5. The bill

- 1 Pieces on the bill
- 2 Totals and GST
- 3 Payment

Before you start

Privilege **Jewellery Invoice**.

Good to know

- Each line is one piece. The same piece can be added twice by mistake; check the list before saving.
- GST is a flat 3% on the whole line. The grand total is rounded to the rupee.

Jewellery Invoices and Printing

Every jewellery bill with its weights and charges, and a print in A4 or 80 mm thermal.

Who	Counter staff	How often	When a customer asks
-----	---------------	-----------	----------------------

Why it matters

A customer who comes back for a copy gets the same detailed bill, with the hallmark declaration.

How to use it

1. Open **Jewellery > Invoices**. Choose the dates or search by invoice number, customer or phone, and press **Apply**.
2. The tiles show the number of bills, their value, what was paid, and what is due. **Status** is Paid, Partial or Due.
3. Press the print icon on a bill. Choose **A4 / Full Page** or **80mm Thermal**, and press **Print**.

- 3 Metal, wastage, making and stones, then GST

Before you start

Privilege **Jewellery View** or **Jewellery Invoice**.

Good to know

- The A4 print carries the HUID of each piece, the amount in words and the BIS hallmark declaration.

Receiving Stock from a Supplier

Record jewellery received from a supplier or craftsman, weighed line by line, at the negotiated cost per gram.

Who	Owner	How often	When stock arrives
-----	-------	-----------	--------------------

Why it matters

The supplier's bill and your stock are both created from the scale reading, so the grams you paid for are the grams in stock.

How to use it

1. Open **Jewellery > Purchase Receipt**. Choose the **Supplier**, type their invoice number and date, and the location receiving it.
2. Search the product (create it in Jewellery > Products first if it is new). Type the **Qty** (pieces), the **Gross Total** and **Net Total** weight for those pieces, the **Cost/g**, wastage, making and stone cost. Press **Add to Receipt**.
3. **Receipt Summary** shows pieces, weights, costs, GST and the amount **Payable**.
4. Press **Save Receipt**. Stock goes up, and an unpaid supplier bill is created.
